PART 1: Review Comments

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The study is uncontrolled , underpowered and biased. Acceptnwith major changes that include providence of educational status of participants as a crucial factor to interpret the findings of this study. Extend discussion to include similar meta-analytic studies.	Thank you for your useful suggestions. To meet the objectives of the study, the authors did not think having a control group was necessary. We admit that the power of the study is limited given the small sample size. The level of education of participants is included in this work and because a majority were of high/ tertiary education status, applying statistical tests to explore relationships was challenging. Other suggestions have been addressed in the amended work.
Minor REVISION comments		
Optional/General comments
