PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Attach a picture of the design layout (RCBD). Do a grammatical check and look at punctuations.	All grammatical checks have been checked and all punctuations properly placed.
Minor REVISION comments	Discuss the average growth cycle of water leaf and justify the fourth nightly destruction and collection of data from the samples. Can you justify why there is inverse relationship in uptake of arsenic in both the soils and vegetables? Support this with appropriate literature.	Bioaccumulation of the metal was exhibited by the content present in the waterleaf after the time d period of exposure to the soil
Optional/General comments	Well presented manuscript with clear writing style. A general look at spellings and punctuations is recommended. Harmonize the referencing style	Thank you for your comments.it has been handled to barest levels
