### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljcti.com/index.php/JCTI/editorial-policy> )

### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The topic is interesting but the manuscript is so superficial. They have to define all the benign lesions especially pathologically. They have to clarify why they happen and so they could explain why each type of benign disease has a peculiar therapy. They have to highlight the confusion that could happen between benign and malignant diseases clinically, radiologically and pathologically. They should clarify if malignant transformation could happen They have to clarify if there are ethnic variations in these diseases. They should give a hint about the complications of therapy.	As per advised we have updated our revised paper. Request to please review and approve for publication.
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
