### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	This type of mini reviews articles are always welcome and very interesting. From my point of view can be published as it is now without changes or additions.	
<b>Optional/General</b> comments	My only problem is with the bibliography: I don't have access to this database and I couldn't check it. Which is why I have to take his word for it that those articles were used correctly and he didn't put them just to have a greater number of cited articles there.	References were evaluated, some do not have a DOI and those that do not have an availability address
