

## Review Form 1.6

Journal Name:	<a href="#">Journal of Engineering Research and Reports</a>
Manuscript Number:	Ms_JERR_86129
Title of the Manuscript:	Flutter modelling and computation of a flying wing aircraft
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljerr.com/index.php/JERR/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>1. SI units to be maintained for weight, instead of t it should be given in kg.</b> <b>2. Equation numbers and there references are not matching.</b>	1. Thanks. The authors have modified the unit. (p3) 2. Thanks. The authors have modified Eq numbers.
<b>Minor</b> REVISION comments	The flying wing has no tail and fuselage, only the huge wing plus fuselage, as shown in Fig. 1. The flying wing model, which is shown in Fig. 1, consists of the fuselage, wings, fuselage frame, and beam ribs. Compared with traditional aircraft, flying wings do not have vertical tail, with better stealth performance. Sentences repeated as highlighted in red.	Thanks. The authors have modified the sentence. (p3)
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
