

## Review Form 1.6

Journal Name:	<a href="#">Journal of Education, Society and Behavioural Science</a>
Manuscript Number:	Ms_JESBS_85375
Title of the Manuscript:	“statistics4school.eu”: A Novel Educational Web Platform for Statistical and Geospatial Learning
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljesbs.com/index.php/JESBS/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>Congratulations on the proposal.</b>  I suggest adding the methodology on which it has been based for the design and development of the web application.  I suggest that the images displayed by the web application have a better resolution. Because it is not clearly visible.	<ul style="list-style-type: none"><li>- Added text describing the design method we followed for the web application.</li><li>- Two (2) images were replaced with new ones, of higher resolution and clarity.</li></ul>
<b>Minor</b> REVISION comments	I suggest adding the techniques or tools implemented for the security of use of the web platform in the end user. Apart from FOSS. I suggest adding an image that contains an example where data is shown with graphs.	<ul style="list-style-type: none"><li>- Added new text</li><li>- Added an example image as suggested (column chart). Picture is as produced by the web tool; scaling it is impossible without cropping it, which will render it vague and non-indicative</li></ul>
<b>Optional/General</b> comments	I suggest adding web application design heuristics. I suggest adding in the theoretical framework of the teaching-learning process. When entering the web page and clicking forget the password; It is important to suggest the type of characters accepted and the minimum number of characters for the password.	<ul style="list-style-type: none"><li>- Text added</li><li>- No restrictions or limitation have been placed; free choice of password</li></ul>

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
