PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<ol style="list-style-type: none">In the presented version, this article cannot be considered a scientific publication. A scientific publication meets several basic criteria: contains the results of its own research; analysis of scientific research data; contains the results of evidence-based medicine.today there are many scientific articles on the study of Ayurvedic medicines. The authors need to justify a more complete scope of why these components of Ayurvedic medicine can be effective in the prevention of covid19. for this, it is necessary to indicate whether the components of Ayurvedic medicine discussed in the article have an immunostimulating and antiviral effect.Perhaps the authors should change the direction of publication to improve the article. For example, "Possibilities of applying Ayurvedic medicine in post covid syndrome"the list of references is extremely limited and framed incorrectly	1-In ayurved srotas is responsible for transportation of element and one of them is pranvah srotas which is described in Samhita and responsible for transportation of oxygen that theory was proved .So in present era in this pandemic situation definitely there is involvement of pranvah srotas and there are medicine which has been using to treat vitiate pranvashrotas definitely will work on lungs.Covid is communicable disease and it is already explained under aupsargik rog in ancient book. 2- It is a review article. 3- I have add some parts and highlighted according to your suggestion.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
