Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The manuscript requires polishing of the English language to improve the readability and understanding of sentences such as:</p> <p>“Therefore, this study intends to assess the presence of antibodies to SARS-CoV-2 discusses immunity against consequent COVID-19 infection.”</p> <p>“ on August-01- 2020 taking”</p> <p>“ reported to be 99.8% specificity and 100% sensitivity”</p> <p>“In height viral loads in the respiratory tract”</p> <p>“We investigated correlates for seropositivity cases in other population.”</p> <p>“ distribution of all male females and age groups adults those who live in the territories”</p> <p>“ we selected the patients randomly basis”</p> <p>“ detected at the group I, whereas groups II were found positive”</p> <p>“ The current study randomly 1229 patients were analyzed sero-antibody total protein observed 1023/1229(83.24%) were negative”</p> <p>“This study was cleared one point that was more males positive and also correlate china city Wuhan.”</p> <p>“ Some studies reported the medicinal plant as a food”</p> <p>“ in treatment of SARS-CoV-2 in the nearby upcoming”</p> <p>Were there any exclusion criteria which should be noted?</p> <p>The Methods section requires restructuring. The section called “Procedure” should be the last section before “Statistical Analysis”. Every other Method happens before the ELISA in real terms.</p> <p>The section entitled “Laboratory Diagnosis” does not provide any useful experimental procedure and should be eliminated</p> <p>The section entitled “Serology of COVID-19” only gives Background information and would fit better in the Introduction</p> <p>In Results “ 26-45” should be changed to “ 36-45”</p> <p>Figure 1 should include the percentages on each sector</p>	<ol style="list-style-type: none">1. English language of the manuscript now revised by a language expert.2. Entire manuscript is revised as per the suggestion.3. Exclusion criteria is incorporated in the manuscript.4. Entire section of material and method is restructured as per suggestion.5. Laboratory Diagnosis is eliminated from the manuscript as per recommendation.6. Serology of COVID-19 is added in an introduction as advised and in the results, age is corrected as 36-45.7. Percentage in figure 2 is added as per suggestion.
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>	There is not any ethical issues in this manuscript and the study is approved by the ethical committee of Isra University which is also provided in the section of ethical approval and consent to participate.
