PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript introduction, abstract, and methodology are similar to the same author published manuscript recently. However, the only change was the sustained release purposing instead of the immediate one. The results are mixed with the methods. The calculations models are difficult for understanding. The target disease and the final aim of the research work needed to be addressed.	This work is in continuation to previous work hence the introduction and methodology for IM part of study would be same. Additional SR part added here in this full work article.
Minor REVISION comments	English Writing and Syntax editing	Done
Optional/General comments
