PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	N/A	
<u>Minor</u> REVISION comments	N/A	
<u>Optional/General</u> comments	This is a very interesting study. The authors in this study showed that participants in this study accept pulmonary rehabilitation because patients would benefit from pulmonary rehabilitation, are interested in referring post-covid-19 patients to rehabilitation providers and co-managing their care, and would like more educational opportunities in order to increase their knowledge of the safety and efficacy of pulmonary rehabilitation. This is meaningful for the public and long-time run. Note: capital and small letter in this manuscript are recommended to be revised.	Noted

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
