### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<b>Was the questionnaire validated?? How was it done? details no</b>  <b>Below Fig 1, mentioned as students were unaware, but in conclusion mentioned as knowledge among students was good, seems to be</b>	The questionnaires underwent a series of validation process that included content, face validity and exploratory part. Item response theory (IRT) analysis was utilized for the validation of knowledge domain. Exploratory factor Analysis (EFA) used for attitude and practice validation.  The figure 1 includes a total of 5 questions related to knowledge. Except the benefits of vitamin D, the students had good knowledge based on other 4 questions. Hence, it was described as unaware of the benefits of vitamin D in results and had good knowledge on vitamin D in conclusion.
