PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">- This is a good study. The author should clearly state the importance of their research and their contribution to this research- I suggest you remove the study limitation in the introduction and move it to the conclusion.- In the method section, how come you ended up or determined 100 samples?- What are the 12 questions consisting of?- Are there any criteria for the adolescent?- How did you reach the respondent?- Did the instrument be tested before being used in this survey?- The presentation of the result is not appropriate in this version. I suggest you make it table and make it in the compact result.- In the result section, you said you used the chi-square test, but it is not presented in the result as a table.- What association you were sought? What is dependent and independent in your study?- The ethical clearance should be articulated	Corrections done
Minor REVISION comments		
Optional/General comments
