### **PART 1: Review Comments**

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<b>Where was the study conducted? Was at tertiary care or multidisciplinary hospital? Who has given the physiotherapy programmes or interventions to the patient? Was it by single trained therapist or a team? whether the care giver was involved in the therapy?</b>  <b>Please put few images/pictures of physiotherapy programmes. It will be more attractive to the readers.</b> <b>Please mention the physiotherapy advises given at the time of discharge.</b> <b>Please include a table of chart of showing outcomes measures before and after physiotherapy intervention.</b>	Suggestions 1,2,3,4 incorporated and highlighted.  Care giver was not involved in the treatment as the patient was in COVID Isolation throughout her hospital stay.  Physiotherapy treatment images were not taken as the patient was in COVID Isolation.  Last 2 suggestions incorporated and highlighted.
<b><u>Minor</u></b> REVISION comments	Please reduces the goals to 2 / 3 only. Some short-term goals look overlapping. Mention the medical management given to the patients in short, if you have records. Mention the views of x ray chest. for example, AP / PA view, erect or laying down. Better to put x rays (before and after) together side by side for better comparison.	Goals reduced and short-term goals corrected.  Medical management details has not been added as this is a purely physiotherapy oriented case study. Chest X-Ray views added.  X-rays have been attached in sequence with the events so as to maintain the flow of progression.
<b><u>Optional/General</u></b> comments	Physiotherapy duration was short. Needs few more follow up. Was the consent taken from the patient?	Physiotherapy duration was short. Follow up was difficult post discharge as the patient is a resides in a remote village.  Yes consent was taken from the patient.

### **PART 2:**

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	Nil
