PART 1: Review Comments

| | Reviewer’s comment | Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| <u>Compulsory</u> REVISION comments | <p>The authors present an interesting report, however, some aspects should be considered before publication</p> <p>-most importantly: what is the clinical message? What is the “key message” of this manuscript? What may the reader take from your case except from a simple presentation? Anything special regarding diagnostics/course/treatment/outcome? Please formulate such message</p> <p>-Spelling should be checked, if possible (i.e. “stent placement” instead of “sent placement), or “balloon angioplasty” instead of “balloon palsy”</p> <p>-Patient identification and present medical history read the same</p> <p>-What is “RTPCR-negative”? HIV-RTPCR?</p> <p>-Please avoid non-standard abbreviations to avoid confusion to the reader and explain all abbreviations used throughout the manuscript.</p> <p>-please provide reference ranges for your laboratory assessments</p> <p>-Please use active ingredients instead of brand names throughout the manuscript (i.e. amlodipine instead of amlong)</p> <p>-what is the reason you performed these lab analyses in this patient? Why not D-Dimer? Please discuss in your manuscript</p> <p>-Was the leg red or blue? You use both terms. In theory the leg should be pale (Pratt’s 6P). Please discuss</p> <p>-Dry or wet gangraene?</p> | <p>Dear Reviewer, I have made corrections as per your suggestion. Thank you.</p> |
| <u>Minor</u> REVISION comments | | |
| <u>Optional/General</u> comments | | |
