PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Use of autologous blood in pterygium surgery has been popular in recent years. There are several advantages of this method except postoperative graft displacement. These are well discussed in the manuscript. However neither larger study groups nor new results were addressed in the manuscript.	Dear reviewer, I have made all the corrections as per your suggestions. Thank You
<u>Minor</u> REVISION comments	The surgical method was not described in detail (for example the type of the suture material used) There are numerous grammar defects in English language Ethics approval was not declared Discussion is not enough References were not written uniformly	Dear reviewer, I have made all the corrections as per your suggestions. Thank You
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
