

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_81326
Title of the Manuscript:	ENHANCING GINGIVAL BIOTYPE WITH VESTIBULOPLASTY AND FREE GINGIVAL GRAFT: A CASE REPORT
Type of the Article	Case report

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	It is a routine way where a periodontists is going to maximize attached/keratinized gingiva besides increasing vestibule depth, so I think it is not a new method. If this manuscript had been performed as a clinical trial design, it would be more useful to practitioners.	Vestibuloplasty is done to increase vestibule depth and to increase the width of the attached gingiva. In this case report not only we have achieved the desired results of increased vestibular depth and increased width of attached gingival but also the type of gingiva. After soft tissue augmentation a thicker biotype of gingiva was achieved. In addition we have also achieved recession coverage.
<u>Minor</u> REVISION comments	Some grammatic errors was seen in "abstract" section. Such as "think gingival biotype" or "my modifying "	The errors were rectified.
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	The case report is not a clinical trial but treatment imparted to a patient attending the regular OPD section of the govt dental college (RDC Guwahati). We decided to perform two procedures together rather than having two different surgeries at two different times.
