

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_ JPRI _81664
Title of the Manuscript:	Gene expression analysis of specific genes related to genomic stability in colon cancer cell lines - a resource for cancer research
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljammr.com/index.php/JAMMR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This manuscript does an excellent job demonstrating significant expressions of nine genes in the colon cancer cell lines (HT-29, HCT-116 and SW-620). This research work is a good informer for all the oncologists for their cell lines of interest. I believe this is a reasonable hypothesis. Other thing that I liked about this manuscript is the pictorial representations of the results which gives clarity towards the conclusive results.	Thank you
Minor REVISION comments	The authors can add an RT-PCR amplification plot to the figure sections.	It is there
Optional/General comments	I recommend that this paper be accepted.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
