PART 1: Review Comments

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	How the countries in the world are classified as low-, middle- and high-income? Throw a highlight over it in Introduction section. Systematic review through PRISMA has been explained well. Correlation between WTP and GDP is satisfactory in Results and Discussion section.	We add additional information regarding the classification of countries based on income in the introduction section according to the suggestions of the reviewers (page 3, lines 3-4). Initially the information was contained in the results section so it was difficult for the reader to catch the information.
Optional/General comments		

PART 2:

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	This systematic review is carried out by only reviewing documents available online and does not involve human or animal objects so that it does not require ethical approval
