PART 1: Review Comments

	Reviewer’s comment	Author’s comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The present proposal has no mandatory comment	
<u>Minor</u> REVISION comments	It is recommended to use mesh in mentioning keywords The references used in the introduction are often outdated, especially in expressing the association between obesity and back pain. Therefore, it is recommended to use more up-to-date articles in this field The methods section is well written In the statistical analysis section, nothing was found about the tests used in the data analysis. Comparative tests between the two groups must be mentioned. There is also no explanation on how to select the sample size. It is suggested that a reason be given for the sample size in each group.	Comment accepted and considered
<u>Optional/General</u> comments	It is recommended to recheck the grammar of the text of the article. There are many spelling mistakes or typo in the text	

Review Form 1.6
