PART 1: Review Comments

	Reviewer's comment	Author's comment: <i>yes i have agreed with reviewer,&corrected the manuscript with changes which i have highlighted in yellow,&have added 4 more references,i have changed the title A Intresting case of SWS.</i>
Compulsory REVISION comments	For the nature and intended purpose implied in the introduction, this is a solid but simplified approach to the subject. NO MAJOR REVISION NEEDED FOR PUBLICATION.	Comment accepted and considered
Minor REVISION comments	There are numerous systemic irregularities in punctuation, formatting, improper use of symbols (ampersand) and nonconventional presentation of proper nouns- i.e. first time referring to a historical person, the full name should be written then every time after that, the author can choose to use only the last name. Please edit the grammatical inconsistencies that are not globally accepted as the standard for English grammar.	Comment accepted and considered
Optional/General comments	The references is primarily of tertiary sources. A thorough review of the body of literature on the subject and inclusion of more recent scientific finding will add to the value of this paper and give it intellectual gravity.	Comment accepted and considered
