PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This is a nice piece of work The author needs to explain about the association of CKD with HTN,Diabetes .what is their pathophysiological aspect behind the same, The author needs to describe what kind of NSAID and other drugs are the common cause , exceptional cause of producing CKD. The authors only analyse chi square test,why not they try other statistical models to test the association . BMI should be included to study the same. The title of the work suggests about the young age population where as the data shows adults ,its needs to be clarify Urea, creatinine analysis should be included . The discussion part is very small it needs to be described properly The refernce needs to arrange same format.	Corrected as suggested
<u>Minor</u> REVISION comments	Abstract should be rearranged ,its look like headings are overlapping	Corrected as suggested
<u>Optional/General</u> comments	Significance values should be marked separately	Corrected as suggested

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
