PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<div>1. Please divide study group into age category. You included wide range of years, so it is necessary to divide.</div> <div>2. Reorganize all results according to the age category.</div> <div>3. Calculate correlation between presence of metabolic status and old and lipid profile with incidence of STEMI in study group.</div> <div>4. Use regression model to predict STEMI possibility in patients with metabolic disorder.</div> <div>5. Table 1 and Table 3 are very similar. Merge data and tables and organize.</div> <div>6. What is exclusion percent of participants. Please explain in the Section Method.</div>	<div>Provided</div> <div>Revised</div>
<u>Minor</u> REVISION comments	<div>1. Uniform all abbrevitaions throught the text, for example tryglicerides (TG), total cholesterol (TC), blood pressure (BP) and for all other parameters....</div> <div>2. Present just presence of comorbidity or condition, not negative connotation in percent in the Section Results.</div> <div>3. Discussion must be more detail.</div> <div>4. Include the latest data about the selected topic (last five years).</div> <div>5. Include the epidemiological latest literature data about the STEMI in young and older.</div>	<div>Done</div>
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
