**PART 1: Review Comments**

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	I would suggest to the author to focus on the analytical analytical QbD (so called DoE (design of experiments) also and include in this write-up along with some examples as a case studies with help of the available literature.	Studies in which DoE has been used in the optimization of analytical methods are listed in Table 1.
<b><u>Minor</u></b> REVISION comments	Author written well about the Qbd, but not given any studies for the formulation development.	Studies in which DoE has been used in the optimization of formulation are listed in Table 1.
<b><u>Optional/General</u></b> comments	I would appreciate the author for spending their valuable time on this write-up. Definitely, this work can give the clear picture to the research scholars in academic and beginners in pharmaceutical industry.
