PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The Omicron variant of Covid-19 has become very prevalent. The virus spreads quickly and is better at evading natural and vaccine-induced immunity than previous versions. Despite the lower severity, due to the sheer number of cases and indirect consequences on the global economy, the public health impact can be significant. While booster immunizations have been used in many privileged countries to restrict the spread of this type, the effectiveness of this technique is questionable. A review of the issues with the Omicron variant is presented in this review.	
<u>Minor</u> REVISION comments	This is a nice review of the issues regarding the Omicron variant of Covid-19.	Okay
<u>Optional/General</u> comments	The authors discuss the issues of Omicron with Pakistan, but perhaps a more general discussion of the issues with other countries or the world would be better. Some improvement in the English should be done.	Improved

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
