PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>In abstract of the manuscript should be rewritten by writing only results obtained in study. The unnecessary discussion of activity of azetidinone and TLC used in study should be removed from abstract section.</p> <p>The abstract should be written with antibacterial results. Study revealed that these azetidinone derivatives are antibacterial active. Authors should also mention the minimum inhibitory concentration for these compounds.</p>	<ul style="list-style-type: none">• The manuscript abstract is being remodified• The unnecessary discussion of activity of azetidinone and TLC used in study are being removed from abstract section.• Anti bacterial results are written• Mild activity is produced in the study and the concentration of the tests compounds are not being calculated• Only whether the synthesised compounds has activity or not is found out.
Minor REVISION comments	-----	
Optional/General comments	-----	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	NIL
