

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_85272
Title of the Manuscript:	Development and validation of a UPLC method for determination of Mirabegron in tablet dosage forms.
Type of the Article	Original research article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">In introduction part:<ol style="list-style-type: none">theoretical explication for UPLC is unnecessary and too long. Because theory of chromatography is an old and wellknown method..There is no reference given in this part for the determination of Mirabegron in pharmaceutical preparations. There are a lot of paper for this purpose in literatures. Reference scanning should be made more carefully.In the text: Given all chromatograms for all working step is unnecessary. Fig: 1, 14 and 15 is enough for this purpose. Because all the values were given in the tables. Twice exposition is unnecessary and also figures take a lot place in the text.Advantages of the developed method is not clearly cited in the conclusion part. It should be done this because it is very important for a work developed.In literatures there are a lot of HPLC method for the determination of Mirabegron in pharmaceutical preparations and in plasma in addition with its metabolites. For example: ANALYTICAL METHOD DEVELOPMENT AND VALIDATION FOR THE DETERMINATION OF MIRABEGRON IN PHARMACEUTICAL DOSAGE FORM BY RP-HPLC . R. Sankar *, K. P. Kishore, B. Babji and M. S. Sulthana DOI: 10.13040/IJPSR.0975-8232.11(5).2223-28	The changes have been done as described and the references have been added.
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	NO
