### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>Here the author fully directed her views on the basis of herbal and marine sources</b> (the pashanabeda element alone. If she mentioned some modern available treatments means it can be highly appreciable from my side because why I'm forcing here means the Urolithiasis (urinary calculi) has the highest prevalence between the age groups 30 and 39yrs and the overall prevalence accounts for about 31.7 in 1 lakh. Everyone can't find herbal and marine sources.	Noted
<b>Minor</b> REVISION comments	If author finds some quality time kindly do mention the list of foods that lowers the risk of stone formation. Its known to everyone that food we intake is directly or indirectly runs the inner mechanism .	Noted
<b>Optional/General</b> comments	Other than this author has did exceptionally well in collecting all the needed plant sources with antiurolithiatic and diuretic activity.	Noted

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
