PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Considering variability of E-cigarette components and interstudy variations it is highly impossible to arrive at specific conclusion about carcinogenicity of E-cigarettes. If at all in vivo studies about carcinogenic effects of E-cigarettes are planned, previous (old) exposure of combustible cigarettes to individuals may act as a confounding factor and further complicate the research outcome.	(<u>All recommendations are followed</u>)
<u>Minor</u> REVISION comments	Components of E-cigarettes must be monitored by competent authority considering individual's theoretical risk of exposure to carcinogens.	
<u>Optional/General</u> comments
