**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<b>Methods: As commented in the manuscript.</b> <b>Results: As commented on the manuscript.</b> <b>Discussion: Need to redo the discussion based on the results. The on results available is the demographic data of the population and a comment of no postoperative pain within 60 minutes in which the statistical analysis was not available and makes very hard to comment on the effectiveness of TAP block.</b> <b>Conclusion: Redo the conclusion based on the analysis of the results.</b>	Suggestions incorporated Results: suggestion incorporated while figures are clearly elaborate the results comparatively with table.  Suggestion incorporated
<b><u>Minor</u></b> REVISION comments	Typing and grammatical error.	Corrected
<b><u>Optional/General</u></b> comments	It is a good study; however, the sample is heterogenous pain level intraoperatively. With this the corelation of type of surgery, VAS score and the effectiveness of TAP block must be shown.	Added in the manuscript

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<b><u>(If yes, Kindly please write down the ethical issues here in details)</u></b>	yes
