| <b><u>Minor</u></b> REVISION comments      | Correct all suggestions mentioned in Ms by the reviewer                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Done                                                                                                                                                                          |
| <b><u>Optional/General</u></b> comments    | Overall, this is a clear, concise, and well-written manuscript. The introduction is relevant and theory based. Insufficient information about the previous study findings is presented for readers to follow the present study rationale and procedures. The methods are generally appropriate. Overall, the discussion is clear and complete. The authors make a systematic contribution to the study in this area of investigation. The longitudinal nature of the work, albeit with college students, is a welcome addition. Overall, this is an average quality manuscript that has implications for the theoretical basis. Ms accepted for publication after suggested correction. | Thank you for the Suggestions manuscript is now according to journal                                                                                                          |
