### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<b>Well-conducted and well-written review . However, to be more comprehensive it would be interesting if the authors also added a part concerning possible therapeutic interventions</b>	<p>Thank you very much for your suggestions. As the article is called a mini-review I considered that addressing to a single issue (ie etiology) is sufficient for the proposed purpose.</p> <p>In order to add a part with treatment of dysnatremias it would be necessary, I consider, to write before a part with algorithm of positive diagnosis. Therefore these changes would take more than 7 days and also would change substantially the article.</p> <p>IF YOU CONSIDER THAT ADDING A CHAPTER WITH TREATMENT OF DYSNATREMIA IS NECESSARY, THEN I WILL DO IT.</p> <p>As suggested by the other reviewer I made some changes/correction on the initial manuscript. I would be gratefull if you could read them.</p> <p>THANK YOU VERY MUCH FOR RAPID REVIEWING AND FOR SUGGESTIONS.</p>
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
