PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The values of root and fresh mass of aerial part, plant height, root length were subjected to analysis of variance (ANOVA) and the means were compared by the tukey test at 5% probability 5%, using the R software The authors may explain the interaction in ANOVA of result section. Mention the R software in the manuscript and explain "tukey test at 5% probability 5%". If picture is present in the manuscript, please mention it e.g., Tukey test result on top of boxplot. Careful proofreading is needed to address issues with use of English language. The discussion opens with a rather weak summary of the background literature and relevance of the study. Please explore it.	All suggestions were accepted and highlighted in red in the manuscript. A careful review of the English language was performed, as advised. The summary of the beginning of the discussion deepened on the relevance of the study.
Minor REVISION comments		
Optional/General comments		We appreciate all corrections and suggestions from the reviewer.

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
