

## Review Form 1.6

Journal Name:	<a href="#">Ophthalmology Research: An International Journal</a>
Manuscript Number:	Ms_OR_89567
Title of the Manuscript:	Central retinal vein occlusion as a presenting feature caused by Hypertensive crisis secondary to IgA nephropathy.
Type of the Article	Case report

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalor.com/index.php/OR/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The authors need to explain why their paper is important. What we have is a hypertensive emergency and its impact on the eyes. What is new? That it is due to IgA disease is not enough of a reason	To the best of our knowledge, this is a rare case report of unilateral CRVO in a young patient associated with IgA Nephropathy. Primary care providers, either ophthalmologists or physicians, need to consider both common and atypical risk factors for retinal vein occlusion, in order to prevent further ocular morbidity and systemic complications.
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
