

## Review Form 1.6

Journal Name:	<a href="#">Physical Science International Journal</a>
Manuscript Number:	Ms_PSIJ_81698
Title of the Manuscript:	New Approach for Extraction of LiOH from Salar Geothermal Brines: Strong Magnetic Stimulations of Nuclear Magnetic Moments
Type of the Article	

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalpsij.com/index.php/PSIJ/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	None.	
<b>Minor</b> REVISION comments	The write-up should be justified.	The author agrees with the reviewer and the write-up is justified by providing more references of spin effects with clarifications of authors new orbital angular momentum of spin for novel effects as is the purpose of article. Connections of such orbital angular momentum of nuclear spins in Na+/K+ in living organisms and Li+ medical treatment in nanochannels in cells are further given for better clarification.
<b>Optional/General</b> comments	More references are required in the work	More reference are provided by the author to connect the author newly disclosed spin angular momentum with work of prior scientists of spin only effects.

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
