Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The content of the case study is well formed. The authors describe the case concisely and in an accurate manner. The language is understandable.</p> <p>- Make one sentence with good phrasing to avoid this repetition. You should add complication of hydatid disease in abstract</p> <p>-You can change it into (eating contaminated food)</p> <p>Headache is repeated, please, delete one In abstract, three sentences with the same meaning repeated three Times. I make a red mark on them.</p> <p>In discussion line 6, (eating ingested food), this sentence is not correct</p> <p>Most patients present with headache and vomiting and headache</p>	<p>I have made the necessary changes and have highlighted them in my corrected manuscript.</p> <p>It is a widespread zoonotic disease, where most cysts develop in the liver and some disseminate to other sites; such as the lungs and rarely, the brain [2, 3]. The incidence of hydatid cyst is the liver is 60%, while that of the cerebral and spinal forms is only 1–2% [4]. In our country, <i>E. granulosus</i> is relatively common in southeast Rajasthan [5]. The larval stage involves the brain via the choroid plexus [2, 6, 7]. Localization of hydatid disease in brain can be associated with involvement of other organs such as liver or lung or may be an isolated infestation of the brain or spinal column.</p> <p>I have changed the line 6 in discussion to eating contaminated food</p> <p>I have changed the line to headache and vomiting and highlighted in the discussion</p>
Minor REVISION comments	<p>Write Involves instead of involve</p> <p>Make (P) small letter</p> <p>Change are to were Change was to were</p> <p>Put were instead of was</p> <p>You can delete the first one Grammar mistake inline 5 of the abstract</p> <p>In presentation of case, line 5 Line 6 Line 7</p> <p>The cyst fluid and abscess pus was aspirated and sent to the Parasitology section</p> <p>The last two sentences of case presentation are repeated</p>	<p>All the necessary grammatical changes have been made and highlighted in the manuscript that I am attaching.</p> <p>The last two sentences of the case presentation have been changed and repletion has been addressed to and highlighted</p>
Optional/General comments
