

## Review Form 1.6

Journal Name:	<a href="#">Asian Journal of Applied Chemistry Research</a>
Manuscript Number:	Ms_AJACR_85522
Title of the Manuscript:	Synthesis, Characterization and Biological Activity of New Amides Containing Azo Moieties
Type of the Article	Research

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajacr.com/index.php/AJACR/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	It is a very small work having synthesized just two compounds from the previously synthesized and published molecules. The characterization of the novel compound 9 has also not been done using NMR, C 13 or elemental analysis. The FT IR, MS and UV are not sufficient for characterization. The compounds have not shown any significant anti bacterial activity. No rationale of condensing the pre synthesized structure to have a potential anti microbial agent is mentioned in the text.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	Stated my comments regarding the quality and content of the article Leave it to the decision of the editor to accept or reject it.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
