### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<u>Abstract</u> ...Quality water supply is one of the constraints being experienced in Mogadishu city and heavy metals content is of concern... this line should be expunged from the abstract After first mention, element symbols should be used to conserve space. <u>Results</u> Data presented in the results section is scanty for a publication <u>Conclusion</u> Conclusion is lengthy. It should be precise and go straight to the point on the findings from the present study <u>References</u> Author(s) did not follow a strict pattern in the reference section.	
<b>Minor</b> REVISION comments	Introduction section should be reviewed. Multiple tables and graphs could have been presented as one table. The information on Fig. 4 & table 2 is it what is presented in figure 5?	
<b>Optional/General</b> comments	The table under this caption...Recommended values in drinking water...please make it more explicit The entire work needs to be properly reviewed and rearranged especially results.
