PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The use of English language in expression is faulty all through the manuscript, especially in the abstract, introduction, result and discussion. Many statements made need to be reconstructed in order for what is implied to be understood.	
Minor REVISION comments	Sufficient statistical analyses have not been carried out; standard deviation and correlation analyses would give more information and better conclusion. The Tables1-3 should have different headings that reflect their content.	
Optional/General comments	As a plant germination and growth experiment, analysis of the potting media to know their mineral content and pH, would have given insight to the growth requirement of Cockscomb.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
