PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In this manuscript, author has successfully demonstrated that DNA can be extracted from mammalian faeces using simple and cost effective protocol. In general, presented results are quiet interested and might have wonderful application in wild life area. Therefore, before considering for publication, there are some minor issues with this manuscript that to be rectify before consideration. 1. It is confusing whether author collected sample between July 2020 and July 2021 or between September 2019 and March 2020 from free ranging and captive mammalian species. Need to clarify	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
