Compulsory REVISION comments	At first did not feel comfortable with reading since it is not a subject of my studies – marine economy, coupling environment and economy. But I found the discussion very relevant and tried to understand the indicators used. Hopefully the economic data, very updated, in the Chinese statistics have given chance for the real results and comparisons among locations	
Minor REVISION comments .	Pay attention to (,) with spaces before; In general, good and clear English; Not clear the meaning of K in the entropy formula	
Optional/General comments	I found interesting peace of work.
