### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	There are a lot grammatical issues that need to be corrected.	
<b>Optional/General</b> comments	The paper is dealing with very important issues regarding coupling and coordination relationship between the marine economy and the marine environmental carrying capacity system. The authors have used SEDI (System Development Index), the Comprehensive Economic Development Index (CEEI) and the Comprehensive Environmental Development Index (CEDI) to assess the region's economic and environmental systems. According to the corresponding weights of each index, the proportion of each index's impact on the marine economy-marine environment total system was calculated. The authors proposed the coupled model of marine economy and marine environment system in coastal areas of Jiangsu Province. The obtained index and subindexes have been carefully evaluated and analysed.
