PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The Abstract section has to cover the main objective and the methods used in the paper. Moreover, it has to point out the main outcome (result) of the research. The statistical analysed period stops in 2018. It is very difficult to obtain pertinent conclusions in 2022 using data from 2018, because the analysis didn't cover the Covid pandemic period, which had a significant impact on international trade. The first equation has to be re-written more carefully. The use of π : income elasticity of import demand can lead to confusions. In another approach, π is 3.14. As a result, the symbol has to be changed with another. Conclusion section is too short and to generally. It has to be modified.	
Minor REVISION comments		
Optional/General comments
