PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	<p>The grammar in the phrase: "this study sets out in search of other potential early warning indicators of financial crisis in Nigeria using several methodological approaches." needs correction.</p> <p>In ther phrase: "Equation (8) models the stationary cyclical component as a finite autoregression rather than a more general ARMA process." a letter is missing in the abbreviation "ARIMA".</p> <p>In Figure 1, some indications are upside down and there is one incomplete.</p>	
<u>Optional/General</u> comments	<p>The literature review is very robust and encompasses all the necessary concepts needed to understand the results! I just suggest inserting a topic covering the concept of "credit to GDP gap". Congratulations!</p> <p>The Logit regression models showed good fit indexes and good percentages of correct predictions.</p>
