It is not also written in result section.</li><li>✚ Moreover, the author investigating determinants of female students low achievement. However, author uses only descriptive analysis. So how do we know the relationship exists between low achievement and the determinants (Psychological, Socio-economic status and Teacher related) unless performed multiple regression analysis. It will be weak output otherwise,</li><li>✚ Which factor more significantly contributing for female achievement in integrated science?</li></ul> <p>Therefore, I think it has to be done!</p>
