

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

Journal Name:	<a href="#">Asian Journal of Fisheries and Aquatic Research</a>
Manuscript Number:	Ms_AJFAR_77215
Title of the Manuscript:	Benefits in Tilapia Growth, by Vetiver Grass in Aquaponics System, Improving The Water Quality and Obtaining an Aggregate Value
Type of Article :	Original Research Article

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>As Author guidelines in AJFAR, it should contain <b>a brief title</b>. I suggest: "Benefits in the tilapia growth, by Vetiver grass in an aquaponics system". This sentence: <b>improving the water quality and obtaining an added value by Vetiver uses in perfumery</b> is not necessary include in title, because readers will find it in the content of your manuscript.</p> <p><b>"Regarding to comment that the Table is too small, the Editor can increase the size of it, if he wants",</b> you cannot answer like this, you submit your manuscript must be accordance with <b>author guideline</b>, it is not depend with Editor.</p> <p><b>"References:</b> I am sorry, but I didn't find many articles on the topic of my research", you must be creative and improvise, references do not have to be with vetiver aquaponic, but aquaponic can also be compared with other types of similar plants that using The von Bertalanffy model.</p> <p>need a flowing and quality way of writing. Fish samples are too small, only 9 fish per minipond.</p>
