PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The findings are sound. However, a lot of the paper's wording and organization is very confusing and ungrammatical. I have pointed at specific instances of these issues on the manuscript itself, but all sentences must be checked. It is essential to be clearer about the data sources, data analysis procedures and the fact that all data is qualitative. The conclusions must compare the results to those of other studies, state the study's limitations, present implications for practice, and present future lines of inquiry in light of the findings.**	
Minor REVISION comments	Again, the wording. Normally wording issues are minor, but in this case they are major and compulsory.	
Optional/General comments		

PART 2:

Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)*
