PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	<ol style="list-style-type: none">1. I would suggest the title should conform better to the research topic and thus should be renamed i.e., as follows: Online information seeking behavior among Indonesian during the COVID-29 pandemic. Because online behavior is too general to describe the behavior that was studied.2. The article is well-written, but there are some points especially in the Discussion that need improvement with respect to the English language (p.4, 2nd paragraph: Our result shows that at the beginning of the pandemic in Indonesia, people tried to adapt the situation with searched about Corona disease to gain knowledge about COVID-19 and also to reduce their anxiety.) Maybe a native-speaker should read the article for grammar and syntax errors. "Many studies has been done" = many studies have been conducted "It is understandable because COVID-19 was just discovered for the first time and there was no evidence yet related this disease, including how to prevent it." = related to this disease, how to prevent from it.	
<u>Optional/General</u> comments
