Manuscript Number:	Ms_AJMAH_78187
Title of the Manuscript:	Impact of targeted bundles to reduce the nebulization time gap from prescription to administration among red triaged patients in emergency department: An quality improvement initiative
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajmah.com/index.php/AJMAH/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This article, despite dealing with an apparently simple subject in many parts of the world, shows that with basic attitudes, without financial costs, emergencies can improve the quality of your care.	
Minor REVISION comments	My only reservation is the fact that it was a shame not to be able to assess patients at three times of the day, which would make the work more robust and with more consistent data. Regarding the writing, I find the quality very satisfactory.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
