PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Community acquired pneumonia NEVER has Klebsella isolated from it. Here the methods donot mention that WHEN THE sputum samples were collected. It has to be collected as soon as possible. The results, that is the type of bacteria isolated seem unusual from CAP cases. 98 % bronchial breathing and still about 30 % no organism isolated ; however, no x-rays are provided. Authors should quote a reference that says Klebsella is a major organism in CAP.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i><u>(If yes, Kindly please write down the ethical issues here in details)</u></i>
