Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Materials: 2.2. You did not mention the study duration in this part. 2.3.. you do not need to use reference in this part.. it is supposed to be your own study and questionnaire 2.5. please specify the statistical analysis software used for data analysis in the current study. I think it is better to specify the type of fish in the farms you included in your study, to be able to make connection between fish specis and the use of different chemicals.</p> <p>Results : In the first paragraph of your results section you mentioned “ Our outcomes suggested that chemicals groups of present study was higher than the Patuakhali and Bogura district of Bangladesh and lower than the Noakhali region of Bangladesh and in intensive shrimp farms in the Philippines [9-11]” why are you using a reference when you speak about your own results?</p> <p>Figure2: need adjustment of figure legend</p> <p>Table1: the table contains a number of chemicals, not the 12 types mentioned in the text... please complete your table with missing data. Figure3: change the figure options to coloured figure to be clearer.</p> <p>In conclusion section: I think it would be better to add a recommendation for increasing the awareness of fish farmers on the excessive and uncontrolled use of such chemicals.</p>	
Minor REVISION comments	Few typing errors need to be corrected	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
